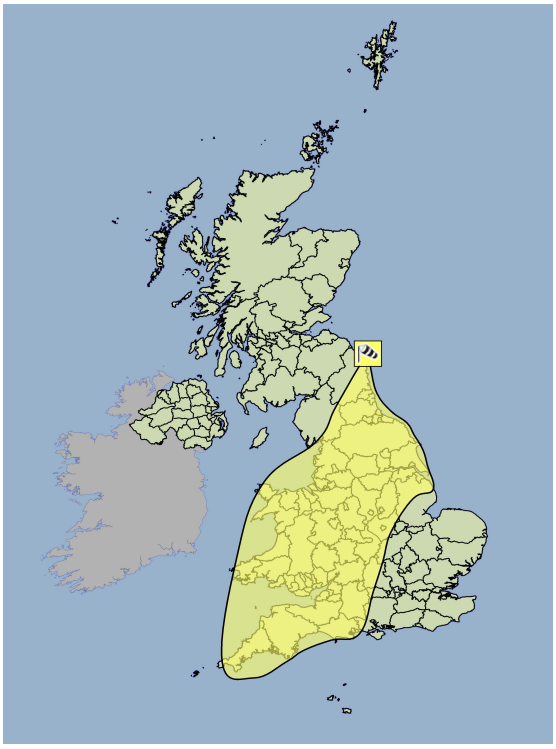
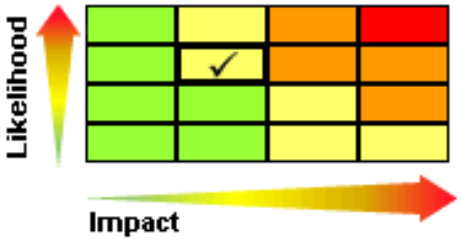
# National Severe Weather Warning Service





**Chief Forecasters Assessment**
An area of low pressure is expected to move southwestwards from the North Sea towards eastern England overnight and then track across the Midlands and southern England on Friday. A swathe of strong winds will develop on its northern and western flanks, producing gusts of 50-60mph across the coasts of northeast England and also the Pennines. Expect inland gusts of 40-50mph. Winds will peak during the morning in the northeast before easing, whilst this peak will occur through the middle of the day for the Midlands and Wales, and finally from mid to late afternoon for the southwest.

The Met Office have issued a **Yellow Warning** of **Wind**

Valid from **00:05 on Fri, 24th May 2013** until **18:00 on Fri, 24th May 2013**

A swathe of strong winds is expected to develop across northeast England through the early hours of Friday before transferring southwestwards across other parts of northern England through the morning, then the Midlands, parts of Wales and southwest England during the afternoon.

The public should be aware of the potential for some minor disruption to travel.
